

Lesson Quiz

Water Erosion

If the statement is true, write *true*. If the statement is false, change the underlined word or words to make the statement true.

- _____ Vegetation, such as grasses, increases runoff.
- _____ An oxbow lake is a meander that has been cut off from the river.
- _____ Groundwater can cause erosion through chemical weathering.
- _____ A(n) alluvial fan forms when sediment gets laid down where a river flows into an ocean.
- _____ Waterfalls and rapids occur where rivers meet and flow over hard rock.
- _____ Deltas and alluvial fans form at the point of river erosion.

Write the letter of the correct answer on the line at the left.

- ___ What is a channel with continually flowing water that flows into a larger river called?
A gully
B flood plain
C rill
D tributary
- ___ Which increases runoff?
A planting crops
B cutting down crops
C flattening land
D replacing pavement with trees
- ___ What is a meander?
A a bend in a river
B the wide area of land along a river
C a fan-shaped sediment deposit
D a large groove in the soil
- ___ Which features are common in areas of karst topography?
A streams
B alluvial fans
C sinkholes
D deserts
